

## Optimised for EFI™ Roll to Roll GS and QS series printers

Ultra Jet DUV-RV has been expertly developed to offer the highest performance on EFI GS and QS Roll to Roll Printers. The ink is suitable for curing with mercury vapor and LED lamps. Offering high quality prints as well as the printer performance needed in a high turnover printing environment. Combining the application advantages with our simple chip solution enables a smooth transition to your Marabu solution.

### Applications:

The UV-curable Ultra Jet DUV-RV is suitable for the following Roll to Roll printers:

- EFI™ VUTEk® GS-Serie z. B. GS5000r, GS3250r
- EFI™ VUTEk® QS-Serie z. B. QS3250r
- EFI™ VUTEk® z. B. VUTEk® 5r+, VUTEk® 32r+ and more

### Substrate range:

- PVC Banner
- self-adhesive films
- Polycarbonate foils
- Poster paper
- Backlit
- Mesh
- Printable fabrics such as Trevira®, and artificial leather

### Your Benefits:

**Simple chip solution + available in compatible 5l containers**

→ No complications with machine access

**NVC-free ink**

→ As a EUPIA member Marabu does not use VCL

**Suitable for LED and Mercury vapor lamps**

→ Fast curing flexible ink film

**High-grade pigmentation and extended gamut**

→ For long-term outdoor use

**Made in Germany**

→ Developed and produced under strict tolerances to ensure highest quality

Characteristics	DUV-RV
Colour Gamut	+++
Flexibility	+++
Pigmentation	+++
